Would have recommended this game if not so OVERLY P2W. Pay 2 win. Set 2 groups of infantry against each other. My group was killed, vs 2 of them. And some godlike tanks etc, its just sad. Just don't spend time in the game, it has no tactics, as the odds are skewed if the other one pays. Unlike the store page suggests, there's no singleplayer mode other than the training missions that don't allow you to advance in the game (by earning currency or new units) and the multiplayer is heavily pay to win.. Changed my review after hitting a higher tier. the games with fairly balanced opponents are ok, most people have different strategies but the tank destroyer which is found only in training, the huge difference in army strength AND THE CHEATERS will ruin your fun after level 6. Better wait or play something else if this sounds like the things that you don't like

10V10

Now that i have your attention, open your mind and read this:

This is currently an excellent game that you play for 30-60 minutes every day, logging 1-2-3 times, it is amazing at what it is and what it does.

For those who know Highgrounds, this is animated less variety highgrounds.

It's an excellent little strategy game, think of hearthstone with more animations but with the same flaws

You get a lot of troop cards and you take 8 in each battle, you have a max of 10 command points which regenerate and you use to play the cards in any way you want. they are deployed on the map on 1 of the 2 lanes or your territory. It's hard to explain but the game is fully animated with good sounds and fun(ny) graphic style.

What makes this game awesome is that strategy is always the thing that wins the game except for when the enemy is very very upgraded. Your units can be rank 2-3 and the enemy 4-5 and you can win in a very short time or even snipe a tower and defend. It's all about the tactic you have, the cards you use and the strategy you decide to use in the game depending on the enemy.

For example: 1) you can even base build with hornet nests, howitzers and troop camps, then attacking with 1-2 units or artillery.

2) You can only take troops and always be on the attack with light/medium tanks, mortars, infantry or commandos

3) mix them both and have a nice game

4) cheese your opponent with defence and a lot of artillery or a heavy tank/air strikes/drops (8 command points while regular infantry is 4 command and medium command points/average on cards in army is 4,1-4,5 depending on player)

5) Snipe towers with jeeps/air drops/artillery

6) Swarm the enemy with soldiers from bases and fast attacks with buffs from officer.

Trivia: this is the second game from the series, battle islands( i think it was a pioneer to f2p games on steam) is a garbage of a copy of clash of clans, really bad game but it helped to make this game

Spoiler: i know this is a copy of clash royale but this game is to clash royale what elder scrolls legends is to hearthstone. The gold edition with all dlc, patches, expansions, player mod vs the early access alpha version.

---

Suggestions for developer:

- 1) There are cheaters who make you lag and lose reaction time, in time this will destroy the game so FIX it.
- 2) Fix alliances, no one donates to you because they need it, no one accepts a challenge because it's useless, there is literally no point in having an alliance
- 3) Add more game modes and more singleplayer elements.

Directions for the game to take:

Add factions, at least 3 factions, each with 3 common, 1 rare and 1 epic unit to their army.

Add wars in which the factions fight for territory, territory generates little crates and resources

Add alliance wars and alliance camps (where players upgrade stuff, fight stuff and train)

Add more maps like a map with 3 towers, a map with longer lanes, a map with natural defences or where events happen like an artillery attack, gas attacks, resource drops etc.

PLEASE PLEASE PLEASE add a 2vs2 map or even PLEEEEEEASE 3vs3 map, those modes would be playing without any reward, i guarantee.

Also add something like a singleplayer when other players are offline so you can attack afk/Von players for a 1-5% of their resources or else everyone will hoard them and buy all units or some units to max.

And the last thing: add a consistent multiplayer map of the real world where every country holds the players that chose it and fight for the borders/resources/score or just fun.. its a free game, and normally i don't downvote a free game.

but this one got issues, although its can be a fun game at times.

the issue i have with this game is the ranking system, i'm a level 4 and my ranking is the same as some level 6 - 7.

so i get to play against level 6 - 7, while thats ok for me, its not really fair, because their units are much more advanced.

also i find it quite annoying that you can't see your KVD or Winrate..

. u need a good computer to run. Great fun units war game.. Pretty fun game

. Pay to win advantage. Not really that tactical if you face better units. Lack of balance. I'd prefer to pay for the game, and for everyone to have the same opportunity to win.. The tutorial was kinda fun...

Then when u go online against other players this horrible creation shows its true disfigured face of disgust.

\*VOMIT\*

---

Alright let me just make this known. About 90% of F2P games have some kind of P2W element to it. So what makes a F2P truly P2W. Lets say 2 players went into a battle and one had better equipment then the other, but the other player was better. If the player who had better equipment wins then thats truly P2W in my opinion. From playing this game I can say that the player whos better with worse equipment will win most of the time.

So technically this game is P2W just like most F2P games, but this one is skill before money.. rip off of clash royale. just a copy of clash royal. I played for almost an hour, after the first 3 missions\level things, I had to play in multiplayer to get better. Multiplayer could be fun, but it is just full of people who payed money to beat everyone else and it is just boring too because you have to also pay money to do most of the things in the game. The creators of this game could improve by removing most Pay to Win options. I would recommend you keep away from this game.. Pay to win, dont waste your time.
